Burlap bags are rugged containers that come in several sizes and weights. 7 oz. burlap is lightweight and is good for general purpose applications. 10 oz. burlap is a tighter weave and more durable. 12 oz. burlap bags are very durable and will hold up to the most demanding applications.

Used burlap bags offer the same benefits at a reduced price. All used bags are cleaned during "reprocessing". Most have printing. Sold in bales of 500 or in bundles of 50 (minimum order of 50).
